Dr. Joshua Lederberg
Chairman, Dept. Genetics
Stanford Medical School
Stanford, California 94305

Dear Dr. Lederberg:

Thank you for the fine article, notes therein, and the dispatch with which you answered. After that, I confess to being a subscriber to Science and Public Affairs - and follow this controversy closely wherever it might take me and insofar as a limited education permits...

Threatening to test the limits of your generosity, I ask more. Have you had a chance to view and evaluate Lester Lave's correlations? His reputation in the economics of air pollution/human mortality-morbidity is recognised.

I include a copy of the most recent issue of Not Man Apart dealing with energy - particularly the radioactive variety. FOE has also begun publishing a bi-daily, a resurrection of our Stockholm conference ECO, in Washington, D.C. commemorating the reopening of AEC hearings on nuclear reactor safety. 620 C St., SE; Washington, D.C. 20003 for copies and support.

Yours,

Jim Harding
